Meet your future team

In order to build value. From Developers & Product Designers to CTO and CPOs that you can hire - we are here to help you translate your idea into a working product.

ordergroup

ordergroup can help you with:

↘ Putting your
development
processes in order

↘ Hiring & running
a remote Dev &
Design Team

↘ Filling up the
responsibilities
of a CTO, or CPO

↘ Building a fast
prototype &
validating an idea

↘ Translating your
vision into a
working product

↘ Educating your
team about
building products

Iza Mrozowska

Senior Product Designer [CPO on hire]

==Discovery & Design==

"First - it's essential to focus on the Users, not tech. We take your idea and turn it into a tangible prototype. By doing so, you can test where your Users' needs & values overlap the most with your assumptions. And this will help you to find a product market fit."

Łukasz Gajownik

Senior Full-stack Developer [CTO on hire]

==Analysis & Development==

"The technical stack and direction for developing your product should be always flexible.
We know that software development is all about adjusting to a dynamically changing environment, and sometimes you need to cut corners & hack your way out to be on time."

Mateusz Widenka

Project Manager [CPO on hire]

==Agile Management / SCRUM==

"It's really crucial to develop and test your product with the Users as soon as possible. That is the only way to prove your business hypothesis or pivot to find a better solution. We'll help you to set up and run a Team that will make it happen."

Our team culture

We've created an environment where we value open-minded, engaged, and honest people who are not afraid of taking responsibility and can deal with challenging tasks.

Agile Mindset

We understand the dynamics of running a business. We adjust our flow knowing that the project requirements can change and priorities can shift during the evolution of the product.

Everything in Order

We work in 1-week sprints and maintain direct communication between product owners and our team. We have daily and weekly meetings & calls so everyone is updated constantly.

Development & design team size	Avg. project development time	Min. developer experience	Time needed to assemble the team	Avg. employment period
40+	22 months	3+ years	1 month	25 months

Providing full end-to-end service: from Product Design
to Development & Support. It takes us usually around
6-9 months to build a product ready for the market

Solid Tech Expertise

Depending on the challenge we will choose the best tech stack for your project optimising quality and cost ratio.

Quality Focus

Every project we manage has a Quality Assurance Specialist and automated tests to provide the highest quality.

Flexibility

We have experience in integrating safe payment gates, various delivery systems, identification and security systems.

Honesty / Transparency

You will receive an estimate for every task and you can track the progress of your project in real-time.
